

Cairo University
Faculty of Computers and Information

Final Exam

Department: CS

Course Title: Algorithms

Course Code: CS316

Semester: 2

Instructor: Dr- Basheer Abdel Fattah Youssef

Date: 6/6/2016

Exam Duration: 2 Hours

Question (1) Minimum Spanning Tree Algorithms (12 points)

Each of the figures below represents a partial spanning tree. Determine whether it could possibly be obtained from Prim's algorithm, Kruskal's algorithm, both or neither.

	PRIM	KRUSKAL	BOTH	NEITHER
	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Question (2) Analysis of Algorithms (10 points)

For each code fragment on the left, check the best matching order of growth of the running time. You may use an answer more than once or not at all. Explain your selection.

	N	$\log N$	$N \log N$	$R + N$	RN	$N + R^2$	$(N + R) \log N$	$N(N + R)$
<pre>int x = 1, i; for(i = 0; i < N; i++) x++;</pre>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

<pre>public static int f2(int N) { int x = 1; while(x < N) x = x * 2; return x; }</pre>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
--	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------

<pre>int x = 0, i; for(i = 0; i < N; i++) x += f2(N);</pre>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
--	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------

<pre>int x = 1, i, j; for(i = 0; i < N; i++) for(j = 1; j < R; j++) x = x * j;</pre>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
--	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------

<pre>int x = 0, i, j; for(i = 1; i <= N; i++) for(j = 1; j <= N+R; j+=i) x += j;</pre>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
--	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------

Question (3)- five sorting algorithms (10 points)

The column on the left is the original input of strings to be sorted the column on the right are the strings in sorted order; the other columns are the contents at some intermediate step during one of the algorithms listed below. Match up each algorithm by writing its number under the corresponding column. Use each number exactly once, explain your answer.

0	deer	bass	bass	bear	bear	bull	bass
1	clam	bull	bear	bull	bull	clam	bear
2	bear	bear	bull	calf	calf	bear	bull
3	myna	crow	calf	clam	clam	bass	calf
4	tuna	deer	clam	deer	deer	crow	clam
5	slug	clam	crab	dove	dove	crab	crab
6	dove	calf	crow	gnat	lynx	calf	crow
7	moth	dove	deer	lynx	moth	deer	deer
8	lynx	hoki	dove	moth	myna	lynx	dove
9	bull	duck	duck	myna	slug	moth	duck
10	calf	crab	gnat	pony	sole	dove	gnat
11	sole	mule	hoki	seal	tuna	sole	hoki
12	pony	moth	pony	slug	gnat	pony	lion
13	seal	lynx	seal	sole	hoki	seal	lynx
14	gnat	gnat	myna	swan	mule	gnat	moth
15	swan	puma	swan	tuna	pony	swan	mule
16	mule	myna	mule	mule	seal	mule	myna
17	hoki	seal	sole	hoki	swan	hoki	pony
18	duck	lion	tuna	duck	bass	duck	puma
19	crab	sole	slug	crab	crab	slug	seal
20	crow	pony	lynx	crow	crow	tuna	slug
21	bass	tuna	moth	bass	duck	myna	sole
22	lion	slug	lion	lion	lion	lion	swan
23	puma	swan	puma	puma	puma	puma	tuna
	----	----	----	----	----	----	----
	0						1

(0) Original input (1) Sorted (2) Selection sort (3) Insertion sort
(4) Shellsort (5) Mergesort (6) Quicksort

***Question* (4) insert the following number in a redblack tree (2,1,4,5,9,3,6,7)
 , show each step and show the color of each node (10 points).**

Question (5) Find longest common subsequence (LCS) BETWEEN Algorithm and Alignment using dynamic programming Show detailed steps(10 points)

Question (6)- Find the shortest path for the following graph from s to t (10 points)

Good Luck
Dr Basheer Youssef.
