#Q1.

1.  $(\Lambda + a(bb)^*)$

2.  $(a^* + b^* + c^*)$

3.  $(c^*a + bc^*)$

4.  $((aa)^* + cb(bb)^*)$

5.  $a^*bc^*$

#Q2.  $(1 + 10)^*(0)^*$

#Q3

1.  $(aa + ab + ba + bb + \Lambda)$

2.  $(a+b)(a+b)(a+b)$

3.  $(\Lambda + b + bb)(a + ab + abb)$

4.  $((a(aa)^* \cdot b(bb)^*)^* + ((b+bb) \cdot a(aa)^*)^*)$

Q4.

1. Language include string has at least <sup>1(b)</sup> ~~1(b)~~.
2. String can start with zero or more a or b.  
in group of three and end with  
nothing or a or b
3. language include at least 1(a)

Q5

$$(b^*ab^*ab^*)^* @ (b^*ab^*ab^*)^* a^* (b^*ab^*ab^*)^* + aaa^*$$

Q6.

1. Language include at least 1(a) and  
end with nothing or ~~nothing~~ with four(b)
2. Language include nothing or start with  
one(a).
3. Language start with one(a) or more and  
with one(b) or more numbers of a's and b's  
is odd
4. Language can include empty string  
or at least 2(b) and 1(a)

~~Example~~

G. can be empty string and must end with @ and start with (a) or (b).

Q7.

$$\textcircled{1} a(aa)^*, (ab)^*a$$

$$\{a, aba, abba, \dots, a^n b^{n-1}\}$$

$$\textcircled{2} (a^* + b)^*, (a + b)^*$$

$$\{a, b, aaa, aab, bba, \dots, \Lambda\}$$

$$\textcircled{3} (a^* + b^*)^*, (a + b)^*$$

$$\textcircled{4} (a^* bbb)^* a^*, a^* (bbba^*)^*$$

$$\{\Lambda, a b^n a\}$$

→ Finite Automata DFA:

Q] 1.  $a^*b^*$

2.  $(a+b)$

3.  $a^* + b^*$

4.

5.

6.

NFA to DFA
